SUMMARY

This survey examined the regulation of football officials and neighborhood leaguers San Miguel de Ibarra and Las Palmas during 2011, the present work was aimed gradeessential to determine the knowledge of the regulations of soccer leaders and players of the two leagues above neighborhood also became known that most involved in thisresearch have a very good level of education, but knowledge about the rules of play arescarce, for this reason the results were troubling because clearly showed that this important issue did not take into account on any occasion for the development and proper functioning of each of the teams participating inthese tournaments neighborhood. Knownresults developed a training program for the regulation of football through the selection and use of appropriate content for easy understanding. In the research mode corresponds to a feasible project, was based on a descriptive, evaluative, literature and field researchers were the leaders and players from the two leagues mentioned neighborhood in the city ofIbarra, who contributed to the population and study group. The training program will benefitmanagers, players, fans and interested public.
